Chop-Chop Weekly Plan

By: Ryan Wetmore & Xander Bezanson

Week	Goal/what we will do that week	Milestone/Due Date	Was goal met/summary of week	Finished week.
1	Brainstorm and start work on the app proposal.	Milestone: finished Brainstorm. Due date: <mark>Jan 17</mark>	We brainstormed, explored several ideas, and settled on creating a wood-cutting idle game for the web.	☒
2	Finalize the app proposal before the due date.	Milestone: Finish app proposal before due date. Due date: <mark>Jan 17</mark>	We finished up the Project charter in time for the due date. And started work on the Weekly plan.	☒
3	Finalize the weekly plan and start drafting the Environment and Workflow Report.	Milestone: Finish weekly plan before due date. Due date: <mark>Jan 24</mark>		☐
4	Wrap up the Environment and Workflow Report, marking the completion of the first major milestone (all main starter documentation). Start the initial prototype.	Milestone: Finish the environment and workflow report before the due date. Due date: <mark>Jan 31</mark>		☐
From here we are done most of the starter documentation and will now start working on the actual project.				
5	Work on the first prototype, focusing on basic functionality (e.g., a button that increments a	Milestone: Finish working on the initial prototype before due date.	a	☐

	counter). This prototype will primarily consist of code with minimal visual design.	Due date: Feb 7		
6	Continue improving the prototype and complete the Peer Review Report due this week.	Milestone: completing the peer review report before due date. Due date: Feb 14		☐
7	Continue adding features, aiming to complete the bulk of feature development.	Milestone: Finishing Advanced feature planning before due date. Due date: Feb 21		☐
From here we should be mostly done adding features and will start working on testing the code.			
8	Prepare for a demo of the app and begin testing the game.	Milestone finish the demo and have something in our testing report. Due date: Mar 10		☐
9	Complete app demo, continue testing, and begin drafting the Testing Report.	Milestone: If demo wasn't done last week, do it this week for the due date. Have a good amount of testing done. Due date:		☐

		Mar 10		
10	Finalize app testing and the Testing Report.	Milestone: Finish the testing report before due date. Due date: Mar 21		☐
From here we should be done working on the code and should be finishing up the final documentation.				
11	Work on the final technical documentation.	Milestone: Have a good portion of the final technical documentation done. Due date: Apr 4		☐
12	Implement final revisions to the technical documentation.	Milestone: Finishing the final documentation before the due date. Due date: Apr 4		☐
13	Complete and submit the final project.	Milestone: Complete the final project submission before due date. Due date: Apr 16		☐
14	Submit the final project (if not completed in Week 13).	Milestone: Complete the final project submission		☐

		before due date. Due date: <mark>Apr 16</mark>		
From here we should be done the project. <mark>NOTE: Talked with teammate, since there's only two of us, we both just assumed we would work on that same stuff at that same time that's why there's no area saying who will do what.</mark>
